# Molina Healthcare of Washington Medicaid Preferred Drug List (Formulary)

04/01/2022

## INTRODUCTION

We are pleased to provide the 2022 *Molina Healthcare of Washington Apple Health (Medicaid) Preferred Drug List (Formulary)* as a useful reference and informational tool. This document can assist medical providers in selecting clinically-appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by Pharmacy and Therapeutics (P&T) Committee and Washington State Drug Utilization Review (DUR) Board, and are approved for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. All the information in the document is provided as a reference for drug therapy selection.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

## PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless the cited drug is available as an injectable or an exception is specifically noted, generally, all applicable dosage forms and strengths of the drug cited are included in the document.

## PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of a Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an advisory body of clinical professionals. The P&T Committee's voting members include physicians and pharmacists, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

## DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, general principles are noted below.

- The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., *atorvastatin*).
- The second column (Requirements/Limits) contains any special requirements for coverage of your drug.
- If the OTC and Prescription versions of the product are covered, then both are listed.
- Extended-release and delayed-release products require their own entry.
- Dosage forms on the document will be consistent with the category and use where listed.

## PRESCRIPTION QUANTITIES

Prescriptions should be written for a therapeutic supply of medications (the amount to appropriately treat a medical condition) up to a maximum of a 30-day supply. Trial quantities may be used when trying new treatments, if appropriate. Drugs listed with DS indicator are covered up to a 90-day supply.

## GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. In this document, *lowercase italicized type* indicates generic availability. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product into the market. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

## PLAN DESIGN

The document represents a closed formulary plan design and does not have any tiering. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non formulary prescription request criteria. Log in to [www.molinahealthcare.com](http://www.molinahealthcare.com) to check coverage.

## PRIOR AUTHORIZATION REQUEST PROCEDURE

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when formulary options have demonstrated ineffectiveness. When these exceptional situations arise, the physician may fax a completed drug prior authorization form to Molina at (800) 869-7791. The forms may be obtained by logging into the website [www.molinahealthcare.com](http://www.molinahealthcare.com). Trials of pharmaceutical samples will not be considered as rationale for approving a prior authorization request.

## PRIOR AUTHORIZATION HELPFUL HINTS

To ensure the quickest response possible from Molina Healthcare of Washington's Pharmacy Department, please provide relevant information with the prior authorization request. The following are examples:

### Class of Medication/Diagnosis

- Cholesterol Lowering
- Diabetes
- Non-Formulary/Non-Preferred Medication

### Requested Clinical Information

- Lipid Panel, Cardiovascular risk factors
- A1c Report
- Medication Log and/or Progress Notes documenting previous use of Formulary medications

## CONTRACEPTIVES

All Contraceptives listed are covered up to 1 year supply at a time.

## EXCLUDED MEDICATIONS

Please note that certain medications are not covered. These include, but are not limited to:

- Appetite Suppressants and other drugs used for weight loss
- Medications used for the treatment of infertility, impotence and sexual dysfunction
- Medications used for cosmetic purposes
- Experimental or Investigational Medications

- Pharmaceuticals determined by the Federal Drug Administration (FDA) to be less than effective and identical, related, or similar drugs (frequently referred to as “DESI 5 and 6” drugs)
- Drugs from a labeler without a federal rebate agreement
- Agents used for symptomatic relief of cough and colds not included on HCA-specific list
- Agents used for aid in dying
- Drugs prescribed specifically for medical studies
- Standard Infant Formulas, enteral nutrition
- Medical Food
- Drugs not FDA-approved or licensed for use in the United States
- Products FDA-approved as medical devices

## **MOLINA BEHAVIORAL HEALTH PROVIDER RESOURCES**

### **Second Opinion Program**

The Second Opinion Program is designed to improve prescribing practices for children ages 17 and younger. In collaboration with The Pediatric Mental Health Advisory Group and the Drug Utilization Review Board, the agency established pediatric mental health guidelines to identify children who may be at high risk due to off-label use of prescription medication, use of multiple medications, high medication dosage, or lack of coordination among multiple prescribing providers.

The guidelines include, but are not limited to, the following:

- Alpha-agonists age and dose limits
- Antidepressant therapy duplications
- Antipsychotic age and dose limits
- Antipsychotic therapy duplications
- Attention deficit hyperactivity disorder (ADHD) age and dose limits
- ADHD therapy duplications
- Insomnia medications
- Mental Health Polypharmacy (medication therapy includes five or more mental health drugs)

Seattle Children’s Hospital provides pediatric mental health second-opinion medication reviews. Second-opinion reviews are required when a psychiatric medication is prescribed outside of guidelines set by the Pediatric Mental Health Workgroup. Seattle Children’s Hospital schedules second-opinion reviews between their psychiatrists and the pediatric prescribers within Molina’s network after the Seattle Children’s Hospital Second Opinion Network (SON) Program receives the necessary information about the child and the requested medication dosage. In addition, they are responsible for sending the written second opinion review back to the Washington State Health Care Authority (HCA).

As part of the authorization process, prescribers are required to engage in a phone consultation from the SON. If a SON review is required, the SON team will call the prescriber to schedule an appointment. To receive payment for the phone consultation, use procedure code 99441 on the claim. If you are a prescriber and have any questions, please contact Molina at (800) 869-7165.

### Partnership Access Line (PAL)

The Partnership Access Line is a consultation program provided through Seattle Children’s Hospital for primary care physicians (PCPs). The consultation is free, funded by the Washington State Legislature and the Washington State Health Care Authority. Any primary care doctor, nurse practitioner, or physician assistant throughout Washington State can call this line for assistance with any type of child mental health advice for any child the practitioner sees. Call (866) 599-7257 Monday - Friday, 8:00 a.m. to 5:00 p.m. PST for assistance, or visit [www.seattlechildrens.org/PAL](http://www.seattlechildrens.org/PAL).

For more information on the second opinion program and the pediatric mental health guidelines, see the [HCA Second Opinion Program](https://www.hca.wa.gov/billers-providers-partners/programs-and-services/apple-health-second-opinion-program) webpage at <https://www.hca.wa.gov/billers-providers-partners/programs-and-services/apple-health-second-opinion-program>.

UPPERCASE	Indicates brand availability

## What is expedited authorization (EA)?

The EA process is designed to eliminate the need to request authorization. The intent is to establish authorization criteria and associate these criteria with specific codes, enabling pharmacies to create an “EA” number when appropriate.

**Reminder:** EA numbers are only for drugs listed in this table.

**Note:** Use of an EA number does not exempt claims from edits, such as per-calendar-month prescription limits or early refills.

### EA Guidelines:

**Diagnoses** - Diagnostic information may be obtained from the prescriber, client, client’s caregiver, or family member to meet the conditions for EA. Drug claims submitted without an appropriate diagnosis/condition code for the dispensed drug are denied.

**Documentation** - Dispensing pharmacists must write both of the following on the original prescription:

- The full name of the person who provided the diagnostic information
- The diagnosis/condition and/or the criteria code from the attached table

Product	EA code	Criteria
Buprenorphine	85000000077	Buprenorphine monotherapy for pregnant clients
	85000000078	Buprenorphine monotherapy for non-pregnant clients while prior authorization is initiated. Limited to 32mg per day, seven (7) days at a time for up to fourteen (14) days every six (6) months.  NOTE: Providers (prescribers or pharmacies) must initiate a prior authorization for further fills.

Testosterone Products

85000000102

For clients 18 years of age and older:

- Testosterone therapy for the treatment of gender dysphoria.

**Aveed** (*testosterone undecanoate*)

**AndroDerm** (*testosterone transdermal patch*)

**testosterone cypionate IM**

**testosterone transdermal gel 1%, 1.62% and 2%**

**Xyosted** (*testosterone enanthate*)

For clients 17 years of age and under:

- Testosterone therapy for the treatment of gender dysphoria; AND
- A pediatric endocrinologist or other clinician experienced in pubertal assessment has determined hormone treatment to be appropriate.

This code will not override prior authorization for brands with generic equivalents or non-preferred products unless client has met tried and failed criteria.

Gonadotropin-releasing Hormone (GnRH) Agonists

85000000103

GnRH therapy for puberty suppression

in adolescents diagnosed with gender dysphoria **AND** a pediatric endocrinologist or other clinician experienced in pubertal assessment has determined hormone treatment to be appropriate.

**Eligard** (*leuprolide*)

**Fensolvi** (*leuprolide*)

**Lupron Depot/Depot-Ped** (*leuprolide*)

**Supprelin LA** (*histrelin*)

**Triptodur** (*triptorelin*)

**Zoladex** (*goserlin*)

This code will not override prior authorization for brands with generic equivalents or non-preferred products unless client has met tried and failed criteria.

85000000104 For clients 18 years of age and older:

- GnRH therapy for the treatment of gender dysphoria.

For clients 17 years of age and under:

- GnRH therapy for the treatment of gender dysphoria; AND
- A pediatric endocrinologist or other clinician experienced in pubertal assessment has determined hormone treatment to be appropriate.

This code will not override prior authorization for brands with generic equivalents or non-preferred products unless client has met tried and failed criteria.

oxandrolone

Before any code is allowed, there must be an absence of all of the following:

- a) Hypercalcemia;
- b) Nephrosis;
- c) Carcinoma of the breast;
- d) Carcinoma of the prostate; and
- e) Pregnancy

85000000110 Treatment of unintentional weight loss in patients who have had extensive surgery, severe trauma, chronic infections (such as AIDS wasting), or who fail to maintain or gain weight for no conclusive pathophysiological cause.

85000000111 To compensate for the protein catabolism due to long-term corticosteroid use.

85000000112 Treatment of bone pain due to osteoporosis.
